# QUALITY POLICY

At KYASS, we consider quality as a fundamental component of the value we deliver to our customers. With the philosophy of "The Science of Seamless Perfection," we combine science, technology, and human expertise to achieve sustainable production through innovative approaches.

In line with the ISO 9001:2015 Quality Management System Standard, we monitor all our processes using defined performance indicators and ensure continuous improvement by regularly measuring customer satisfaction, on-time delivery performance, process efficiency, and error rates.

Within the scope of our quality policy, we adopt a risk-based approach, ensure compliance with legal and customer requirements, and regularly evaluate the effectiveness of our processes to secure the continuity of our quality performance.
